

For Immediate Release

Ellumen Invited to Present at Inaugural (ISC)2 Security Congress

Company Selected to Present on Data and Device Security at High Profile Event

ARLINGTON, VA – Wednesday, September 14, 2011 - [Ellumen](#), a provider of expert services and IT solutions to federal and commercial health enterprises, today announced it has been invited to participate in the inaugural (ISC)2 Security Congress with other high-profile speakers such as Jeb Bush, former Governor of Florida, and Vicente Fox, former President of Mexico, who are scheduled to keynote the conference. Collocated with the ASIS International 57th Annual Seminar and Exhibits, the Security Congress will take place from September 19-22 in Orlando, Fla.

Ellumen's senior security architect, Dennis M. Seymour, will be presenting an educational session titled, "[Identify, Assess and Mitigate Security Risks Associated with New Mobile Devices and Applications](#)." Seymour will discuss how the development and implementation of industry-specific devices (medical and financial) differs from IT devices and applications, and more importantly, brings on new risks associated with these devices being introduced into those networks. He will address industry-specific [data security](#) requirements and regulations and the efforts being made, as well as how to improve the security of these devices and applications. He will be making his presentation as part of the Mobile Security & Social Networking track at 11:00 a.m. to 12:00 p.m. on Wednesday, September 21.

"I am so honored to be selected to present at this highly influential venue and amongst such high caliber speakers," commented Dennis Seymour. "The (ISC)2 organization is an exceptional leader in information security and I look forward to being a part of efforts in educating information security professionals."

Seymour is a Certified Information Systems Security Professional (CISSP) and Program Management Professional (PMP). He has over 15 years of healthcare-specific security experience, including 12 years of experience at the enterprise level for the Department of Veterans Affairs. He is fluent in policy development, system controls assessment and certification, and [medical device security](#) policy development and compliance with HIPAA, NIST, FISMA, and other requirements. Seymour has managed projects for the Department of Veterans Affairs funded in excess of \$16M annually and \$36M over the course of the contract. In 2010, he was a finalist for the (ISC)2 U.S. Government Information Security Leadership Award (GISLA).

(ISC)2 is the largest not-for-profit membership body of certified [information security](#) professionals and administrators of the CISSP. This global event aims to bring together security professionals from all disciplines, with 700 exhibitors and over 200 speaker sessions, making it one of the largest security conferences in the world.
